September 2021

Emamou

About

Emamou commits to delivering only low-carbon sustainable materials and products for the circular and bioeconomy. They decline our dependence on fossil resources, reduce greenhouse gas (GHG) emissions of the plastic industry, create new jobs and sustainable markets. Sustainable products are established in our key business portfolios as they contribute to a greener and more sustainable economy and society.

Emamou supplies a variety of sustainable and compostable cutlery, stirrer, and chopstick, for a wide range for the catering industry and daily use. Our products have FSC certificates and the European certificate complied with the EN Standard 13432 for compostability.
